

Switch and Save Energy, Money and the Environment

ENERGY STAR® rated compact fluorescent light (CFL) bulbs use less power and last up to 10 times longer than traditional incandescent bulbs.

That's why thousands of SCE customers are joining the national "Change a Light, Change the World" pledge drive to replace their light bulbs with energy-efficient CFL bulbs.

For SCE customers, switching to CFLs is more than money-saving, energy-efficient, and environmentally safe – it's fun and exciting too.

You could be featured in an SCE television commercial when you submit a photo or video of yourself and your CFL.

Pledge to switch to CFLs today! To learn more about CFLs and SCE's special offers, please visit www.sce.com/newlight.

We Wish You a Safe Holiday Season And a Happy New Year

As you prepare for the holiday season, SCE reminds you to follow these important safety suggestions:

- > Don't use frayed cords and wires, broken fuses and light bulbs, or loose connections.
- > Use only Underwriters Laboratories (UL) approved lighting and extension cords and use plastic ties instead of staples, tacks or nails to hang lights.
- > No more than three strands of lights per electrical cord/outlet.
- > Keep live trees watered and keep watering pans away from electrical cords.
- > Don't use lighted candles on or near holiday trees or decorations.
- > Unplug decorative lights when you leave home and before going to sleep.

SCE wishes you and yours a safe and happy holiday season. For more holiday safety tips, please visit www.sce.com/safety.

FOR OVER 100 YEARS...LIFE. POWERED BY EDISON.
