

May 13, 2004

Ms. Magalie R. Salas, Secretary
Federal Energy Regulatory Commission
888 First Street, N.E., Room 1A
Washington, D.C. 20426

SUBJECT: Big Creek Hydroelectric Project - FERC License Project Nos. 67, 120, 2085, and 2175
Alternative Licensing Process - Progress Report No. 8

Under 18 CFR 4.3.4 (i)(6)(ii), Southern California Edison (SCE) is required to submit a report summarizing the progress made in the pre-filing consultation process and referencing the Applicant's public file, where additional information on that process can be obtained. SCE maintains a record of its pre-filing consultation process in its Relicensing website for the Big Creek Hydroelectric Project. To satisfy the regulatory requirement, SCE, after consultation with Commission staff, is providing nine copies of SCE's Big Creek Relicensing Website in Adobe Acrobat format on the accompanying CD-ROMs to the Commission. It is our understanding from Commission staff that this information satisfies the requirement of the referenced regulation. The information is available to the general public at www.sce.com/bigcreek.

If you have any questions, please contact Geoff Rabone at 909-394-8721.

Sincerely,

CARLA J. ANTHONY
Relicensing Coordinator
